

Product Specification Sheet

Product Name: Ambrisentan

Catalog Number: C2627

Technical information:

Chemical Formula: $C_{22}H_{22}N_2O_4$

CAS #: 177036-94-1

Molecular Weight: 378.42

Purity: > 98%

Appearance: white solid

Solubility: Soluble in DMSO up to 100 mM

Chemical Name: (S)-2-((4,6-dimethylpyrimidin-2-yl)oxy)-3-methoxy-3,3-diphenylpropanoic acid

Storage: Store solid powder at 4°C desiccated; Store DMSO solution at -20°C.

Shelf Life: In the unopened package, powder is stable for 1 year and DMSO solution is stable for 6 months under proper storage condition.

- Handling:**
- To make 10 mM stock solution, add 0.264mL of DMSO for each mg of Ambrisentan.
 - For DMSO solution, briefly spin the vial at 500 rpm in a 50 mL conical tube to ensure maximum sample recovery.

Biological Activity: Ambrisentan is a propanoic acid-based, orally-available, endothelin receptor type A-receptor antagonist for the once-daily treatment of pulmonary arterial hypertension (PAH). It has >4000-fold selectivity for the type A receptor over type B receptor. Studies indicate that Ambrisentan has a low potential for drug interactions and at therapeutic concentrations does not inhibit UDP-glucuronosyltransferases or CYPs, or induce MDR protein 2 or P-gp. (1)

In contrast with other similar therapies, Ambrisentan has been shown to have a lower potential for increase of serum-level concentrations of aminotransferases. (2)
