

Product Specification Sheet

Product Name: NVP-LGK974

Catalog Number: C6545

Technical information:

Chemical Formula: C₂₃H₂₀N₆O

CAS #: 1243244-14-5

Molecular Weight: 396.44

Purity: > 98%

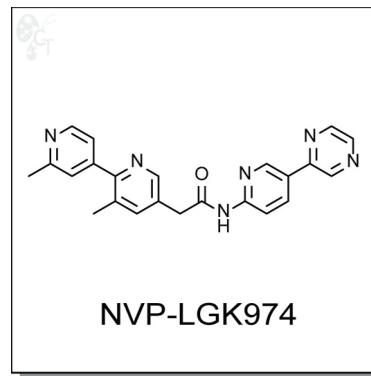

Appearance: White solid

Solubility: Soluble in DMSO up to 100 mM

Chemical Name: 2-(2',3-dimethyl-[2,4'-bipyridin]-5-yl)-N-(5-(pyrazin-2-yl)pyridin-2-yl)acetamide

Storage: For longer shelf life, store solid powder or DMSO solution at -20°C desiccated.

Shelf Life: In the unopened package, powder is stable for 1 year and DMSO solution is stable for 6 months under proper storage condition.

- Handling:**
- To make 10 mM stock solution, add 0.252mL of DMSO for each mg of NVP-LGK974.
 - For DMSO solution, briefly spin the vial at 500 rpm in a 50 mL conical tube to ensure maximum sample recovery.

Biological Activity: LGK974 is a potent and orally active Wnt pathway inhibitor with an IC₅₀ <1 nM in the Wnt signaling assay [1]. It inhibits acylation of Wnt proteins by Porcupine (Porcn). LGK974 specifically blocks the proliferation of pancreatic cancer cells that have up-regulated Wnt signaling caused by carrying inactive mutations in a Ubiquitin E3 ligase, RNF43 [2].

LGK974 robustly suppressed Wnt signaling in vivo resulting in tumor regression in a murine breast cancer model driven by MMTV-Wnt1, and showed excellent efficacy in xenograft models of head and neck squamous cell carcinoma and pancreatic cancer [3]. Currently LGK974 is in the Phase I study to treat patients with different types of Wnt signaling-driven cancers [4].
