

Product Specification Sheet

Product Name: SYN115

Catalog Number: C7911

Technical information:

Chemical Formula: $C_{19}H_{26}N_4O_4S$

CAS #: 870070-55-6

Molecular Weight: 406.5

Purity: > 98%

Appearance: White solid

Solubility: Soluble in DMSO up to 50 mM

Chemical Name: 4-Hydroxy-N-[4-methoxy-7-(4-morpholinyl)-2-benzothiazolyl]-4-methyl-1-piperidinecarboxamide

Storage: Store solid powder at 4°C desiccated; Store DMSO solution at -20°C.

Shelf Life: In the unopened package, powder is stable for 1 year and DMSO solution is stable for 6 months under proper storage condition.

- Handling:**
- To make 10 mM stock solution, add 0.246mL of DMSO for each mg of SYN115.
 - For DMSO solution, briefly spin the vial at 500 rpm in a 50 mL conical tube to ensure maximum sample recovery.

Biological Activity: SYN115 (Tozadenant) is a orally-available, benzothiazole-based, antagonist of the Adenosine A2A receptor for the treatment of Parkinson's disease and other CNS-related conditions. SYN115 is being pursued as a monotherapy as well as in combination with L-dopamine and is being studied for its potential neuroprotective effects. [1]

Animal studies with SYN115 support beliefs that A2A antagonists reduce Parkinson's symptoms by reducing the inhibitory output of the basal ganglia indirect pathway. Using Cerebral Blood Flow (CBF) as a pharmacodynamic parameter, studies have shown that SYN115 induces a significant decrease in thalamic CBF, consistent with the deactivation of the indirect pathway. [2]
